

Our Core Problem and it's Solution

It is clear that something horrible is happening in our world. The discord that has been erupting is not natural. **But, in order for things to get better the core problem must be faced, exposed and stopped.** Please give this statement the benefit of your possible doubt. This core problem can be easily proven to be true. All it needs is the types of investigations, that awareness can enable. Please become aware and help spread the word, especially to officials who can help stop the problem from continuing.

Most people are aware that radio waves can be shot down to people's homes and businesses, **from satellites**, for the purpose of internet access. It is a scientific fact that certain frequencies of radio waves can interfere with brain function. It is a scientific fact that radio waves, which are tuned to the same frequency as the human brain, can be used to transfer thoughts from the human brain into a computer to be read. The field of medicine has publicized this. And there are other experts who are far more advanced with these sorts of thing, but have not documented or advertised it due to criminal use of it. The reverse can also happen - thoughts can be plugged into the brain through a computer...etc. Various levels of interference with natural brain function can be done with satellite surveillance systems, which can also emit and direct radio waves. **These technologies can be used to flood whole communities with brain washing radio waves or can watch and target individual people in more severe ways. And these technological brainwashings are far more effective on people who are taking the types of pharmaceuticals, which numb the brain and inner senses like instincts, intuition, compassion...etc.**

These types of pharmaceuticals have been being distributed on a massive scale under the guise of them being needed for what is claimed to be mental disorders. Around the 1950s, people like Dr. Thomas Szasz, had fought to expose and stop a scam of false "mental illness" labeling and the prescribing of psychiatric pharmaceuticals to healthy people who did not really need them. But he appears to have been targeted and then the problem grew instead of being stopped. There are now massive amounts of healthy people who take the same psychiatric pharmaceuticals, which aid technological manipulation of their brain. (Mental and emotional problems can be inflicted with radio wave targeting.)

But people who have been prescribed psychiatric pharmaceuticals are not nearly the only ones who have been consuming them. In 2008 CNN and ABC news reported psychiatric pharmaceuticals being found in both public and bottled drinking water throughout America. In 2014 they were still there. This was thought to be due to run off of contaminated waste, because of the massive amounts of the pharmaceuticals that people take. This makes perfect sense. But I feel that there is another problem too. Due to a dream I had, and events that took place after my sharing of the dream, I feel that **these pharmaceuticals have also been intentionally put into America's water supplies, in order to aid the technological mind control.*** I feel that this is an intentional attack against the freedom America has stood for.

I suspect that the psychiatric drugs have also been put into other types of pharmaceuticals or foods...etc. The brain and sense numbing pharmaceuticals alone are horribly destructive, because they have been blocking people's instincts and hearts. This prevents the natural process of inner personal growth - people have not been allowed to grow and evolve into the functional, healthy human beings most of us would be if we were free. This enslaves all who have consumed them either through prescriptions or the water or whatever else that may be being used to force them into people. Add in the radio wave manipulation of the brain and there exists various levels of **remote control of human beings.** And those who hold the controls clearly do not have good intentions.

There are general brain washings, that appear to have been being done on a massive scale. In the mildest levels of it people can be encourage to do things like vote for a particular person or shop at certain stores...etc. In more destructive levels of it people have been being pitted against each other, in both covert and overt wars between races, between citizens and governments, between government agencies, between the rich and the poor, between religions, between political parties, between countries, between loved ones...etc. It has been shoving people toward seeking vengeance instead of functionally resolving issues...etc. On the worst levels of it there are people who are completely enslaved, are no longer who they once were and are a tool for their controllers to use in any way they choose. On the milder scales there are masses of numb and oblivious people who think they are free, but aren't really.

Technological and Pharmaceutical Mind Control, appears to have been happening since the invention of the Tesla technologies around the year 1900. And it appears to be happening, on a massive scale, since at least the 1950s. It is now the core problem behind most of the other problems we are faced with, both inside and outside the government. This is a horribly holocaustal situation, that is lead by evil forces, and has not only been targeting America, but all of humanity. **Public awareness can make it lose a lot of its power. Once we are aware we can second guess our thoughts and dig deeper into our hearts and instincts before we act or make important decisions. Awareness can prevent a lot of the blaming and judging of people who are also victims and replace it with understanding and support. Please spread the word.**

People, from all walks of life, should be pulling together to help each other through

this, instead of being used to fight against each other.

Criminal use of space based technologies, which can emit and direct radio waves, and the administering of harmful pharmaceuticals, must be stopped ASAP. I beg all who read this to help, in every possible peaceful way, to restore our Freedom.

Some blame the government, but according to things I've witnessed and experienced, many government officials are unaware victims of it too. That I know of, there are many victims (including of complete enslavement) in the government, especially in local and state law enforcement, military...etc. Masses of people, both inside and outside the government, have been being used to help achieve goals of the evil forces that lead this holocaust. The government needs its freedom restored too.

Trying to deal with a crisis, without addressing the core problem, is like trying to navigate rapid flood waters without arms or legs. Please realize the core problem and do every peaceful thing you can to restore freedom and deliver the public awareness that will be needed for recovery.

ATTENTION OFFICIALS; The radio waves, that are used for mind control can be easily detected with radio wave detection technologies. However, **I suspect that radio wave detection and blocking technologies, which government officials have been using, may have had a filter built into them in order to bypass the low frequencies that are used for mind control. And I suspect that certain modes of "protection" from the radio wave targeting may have actually been modes of enslavement. Please investigate these things IMMEDIATELY!** Please protect yourselves so that you can be here for us in ways that are desperately needed. Please do everything you can to set us all free.

P.S. There are also other criminal uses of the satellite surveillance and laser weapon systems. They can be used to shoot radio waves into people's bodies, in order to inflict physical pain or in order to affect organ functions in ways that create physical illnesses. Some of what has been being called "mental illness" is victims being abused/tortured, in multiple ways. Their suffering is indescribable. And they should be helped and protected. Radio waves can also be used for weather modification, which the effects of is also extremely evident. And there is more, but not enough room for one paper. All criminal use of the technologies and pharmaceuticals must be stopped as quickly as possible. Please help it stop.

* **Filtering water through charcoal may help clean the water, and we can easily make a homemade filter. (Look it up on YouTube). Lead helps to block the radio waves and surveillance and it should be brought back into the paint on our homes...etc.**

Help Yourself and Others With Visualizations

The general mind control programing is really dark/evil and **it is helpful to do visualizations of pure White Light streaming from the heavens and filling your head and body and washing out the darkness. You can also visualize the Light going into your loved ones, your business, your neighborhood and all around the globe...etc. This actually works miraculously when it is done with deep concentration and on a daily basis.** It cannot block the radiowaves...etc., but it can easily and quickly wash away the darkness that has been being inflicted into people with them. Our world desperately needs the Light right now and I hope it gets enough of it very quickly. We should all be working at visualizing White Light and directing into ourselves and others. This and stopping the radio wave and pharmaceutical targeting is the solution to most of our problems. **Hopefully soon, we will regain our freedom.**

This information comes from direct experiences and things witnessed by me - Sharon Rose Poet, PO Box 383, Mont Vernon, NH 03057 - 603-801-9763. My birth name was Sharon Y. LaBree. My married name was Sharon Buck. And my pen name was Namatari Neachi. Find more information on www.poeticpublications.com
